1. Summary

It is widely known that the Internet has transformed the global economy and enabled new forms of social interaction, activities, and associations. It allows us to research, transact and communicate worldwide.

According to www.internetworldstats.com, **51% of the world's population is connected through the internet.**

With half of the global population online, **the world financial system is changing and cryptocurrencies play a leading role.** It is becoming clear that blockchain could be the core of a wide variety of decentralized infrastructures. New digital ecosystems may develop based on the blockchain networks as they offer open source models. In this context of decentralized networks, economic value and governance are distributed among all participants of the net: developers, investors, supporters, operators and consumers.

Blockchain technology has also changed the way we see government currency. Bitcoin and Ethereum have proved that it is possible to transfer money securely and privately around the globe. Cryptocurrencies do not need leading authorities. The democratization of the monetary system can be achieved.

The NeoCash NEOC Dev team strongly believe that each person should be free to choose cryptocurrencies over classic money, without having to resort to third parties, and expensive cumbersome procedures.

Bitcoin and blockchain started a new world, and it has an extremely bright future ahead. NeoCash NEOC **wants to be there, join us on this path towards cryptoworld. It is approaching every corner of the planet.**

2. Introducing NeoCash NEOC

NeoCash NEOC is a global decentralized token on the Ethereum blockchain.

NEOC is a multipurpose cryptocurrency designed to meet the needs of various types of users. Harnessing the power of blockchain technology and Ethereum Network, NeoCash NEOC enables fast, safe and secure transactions. The smart contract underlying the transaction acts as the mechanism that permits reliable trading between buyers and sellers without third parties.

The key features of NEOC are fast and anonymous transactions.

WHAT IS A TOKEN?

A token is a smart contract.

From Wikipedia: *"A smart contract is a computer protocol intended to digitally facilitate, verify, or enforce the negotiation or performance of a contract. Smart contracts allow the performance of credible transactions without third parties. These transactions are trackable and irreversible. Smart contracts were first proposed by Nick Szabo in 1994. The aim of smart contracts is to provide security and to reduce other transaction costs associated with contracting. Various cryptocurrencies have implemented types of smart contracts."*

Smart contracts offer substantial benefits by automating contractual agreements that reduce transactional friction, cuts costs, while boosting data security.

Cryptocurrencies will continue growing leading the way to democratize the financial system. In this sense, NEOC is a multipurpose token.

3. Platform

NEO CASH

NeoCash NEOC is an ERC20 token, compatible with the existing infrastructure of the Ethereum ecosystem. ERC20 tokens are smart contracts that run on the Ethereum blockchain and can be traded on all platforms that support Ethereum standards.

NEOC has a green-marked verification contract on EtherScan.

NEOC also **has a green-marked verification contract on EtherScan, and this make it very reliable.** Having that verification means that NeoCash NEOC code is free of bugs and warnings. NEOC Features and capabilities as well as the code are available for consultation on etherscan. [Click to check this information.](#)

It is important to remark the importance of a green-marked verification on etherscan, since many tokens do not have it because of bugs in their codes, resulting in a loss of credibility. There are also non-verified tokens which code is not available.

NeoCash

SPECIFICATIONS

Name: NeoCash

Plus Contract: 0x91a6f588e5b99077da9c78667ab691564a8fa4dd

Symbol: NEOC

Decimals: 8

Total Supply: 80 000 000 NEOC

Protocol: ERC20 on Ethereum network

Wallet compatibility: Myetherwallet (recommended), Metamask, Parity and more.

Like other cryptocurrencies, **NeoCash NEOC is fungible and transferable, and it will be expected to trade on cryptocurrency exchanges.**

Visit our NeoCash NEOC official Website and check the exchanges we are currently listed on: www.neocash.cash

4. NeoCNEOC Distribution

THE DISTRIBUTION WILL BE AS FOLLOWS:

Fund distribution

- 32 millions Token
- 12 millions Token sale
- 12 millions Hard Cap
- \$0.01 - Coin price

Token distribution

- 40% Airdrop: Free
- 15% Reserved Funding
- 15% Founders and Team
- 15% Advisors
- 10% "Bounty" campaign
- 5% "Bounty" campaign

7.Roadmap

Q2

Whitepaper v2.0
Introducing our Educative Project
Reward program

Q3

Publication of educative material about cryptocurrencies
on our Website
Invite our Community to participate in the creation of
educative material related to Cryptocurrencies

Q4

Deepening the Project. Planning our Education Platform

2019

Exposition of the Project and its planification to our
Community
Final revision.
Crowdsale (to raise funds for the project)

H2

Launching of the Platform and publicity campaign

9.Disclaimer

PLEASE READ THIS SECTION CAREFULLY

If you are in any doubt as to the action you should take, you should consult your legal, financial, tax or other professional advisor.
